

Insurance Report

Comprehensive losses

2020–22 passenger cars, pickups,
SUVs, and vans

C-22 April 2023

Highlights

The comprehensive claim frequency for passenger vehicles from the 2020–22 model years was 80.4 claims per 1,000 insured vehicle years. The average loss payment per claim (claim severity) was \$2,356. The result was overall losses (average loss payment per insured vehicle year) of \$189.

Glass losses accounted for 70 percent of claims but only 20 percent of paid dollars. The glass claim frequency was 56.6 claims per 1,000 insured vehicle years, while the average claim severity was \$663, and overall losses were \$38.

Theft losses accounted for only 2 percent of comprehensive claims but 13 percent of paid dollars. The theft claim frequency was 1.7 claims per 1,000 insured vehicle years, while the average claim severity was \$14,211, and overall losses were \$24.

Other losses accounted for 27 percent of claims and 67 percent of paid dollars. The claim frequency for other losses was 22 claims per 1,000 insured vehicle years, while the claim severity was \$5,786 and overall losses were \$127.

2023 Board of Directors

Chair

Stefanie Zacchera, The Hartford

Vice Chair

Chad Mirock, COUNTRY Financial

Prior Chair

Kathleen Ores Walsh, USAA

Gavin Blair, The Hanover Insurance Group

Chad Covelli, Rockingham Insurance

Olivia Doll, Progressive Insurance

Erik Donahue, State Farm Insurance Companies

Robert Harrington, Erie Insurance Group

Joseph Highbarger, American National

Tim Hyman, American Family Insurance

► Introduction

This Highway Loss Data Institute (HLDI) report presents insurance losses under comprehensive coverage for passenger vehicles produced during model years 2020–22. Vehicles in this report were up to 4 years old during the period studied. Additionally, comprehensive losses are presented separately for the three loss types under comprehensive coverage:

- **Theft** represents losses resulting from the theft of a vehicle or vehicle components.
- **Glass** covers the repair or replacement of vehicle glass broken by rocks from the road or other noncollision events.
- **Other** represents losses resulting from the repair or replacement of nonglass components damaged by rocks or road debris and damage caused by noncollision events such as fire, vandalism, acts of nature, and animal strikes. Most insurance companies consider an animal strike to be a comprehensive coverage event and not a collision coverage event.

Results for all 2020–22 vehicles are included in the overall totals and in the separate totals for class and size subgroups in the principal table (**Table 4**). Theft losses by series are listed in **Table 5**, glass losses by series are listed in **Table 6**, and other losses by series are listed in **Table 7**. A detailed description of these class and size subgroups appears in the HLDI (2010) *Technical Appendix*. Exposure requirements for the three loss types were 20,000 insured vehicle years for theft and 2,000 insured vehicle years for glass and other. A total of 640 passenger car, pickup, SUV, and van series met one or more of these reporting criteria.

Results in this report were standardized to control for the effect of demographic and geographic variables to accurately assess the contribution of the vehicle to insurance losses. Losses were standardized by calendar year, model year, garaging state, number of registered vehicles per square mile (vehicle density), driver age, gender, marital status, deductible, and risk. Standardization was accomplished using a two-step process. First, regression models were constructed to produce estimates for each variable for claim frequency, claim severity, and overall losses. Then, the estimates were reweighted so that every vehicle has the same exposure distribution across all the variables in the model.

This standardization procedure was first described in the HLDI special report A-77, *Make and Series Results and Modeling* (HLDI, 2008). Further modifications were described in HLDI special report A-82, *Collision Losses After All-Variable Standardization* (HLDI, 2009). For details about this procedure, see the *HLDI Loss Data Computation Methods* (HLDI, 2018).

To quantify the relationship between individual vehicle series and claim severity, it is necessary to estimate the mean and variance of the severities. A minimum of two claims is necessary to produce a mean and a measure of variance. Because fire losses are infrequent events, this two-claim minimum per vehicle would have eliminated many vehicles from the report. Consequently, fire losses were included in the category of other losses.

To provide information on as many vehicle series as possible, comprehensive data for model years 2020–22 were combined for those vehicles with basic designs that remained unchanged. Also, some individual series were grouped into combined series (vehicles that are similar but have different engines). These combinations are listed in the **Appendix**.

► **Comprehensive claims and dollars by loss type**

Figure 1 shows claim sizes along with the percentage of comprehensive claims and paid dollars by loss type for 2020–22 model year passenger vehicles. The category “other”, which includes acts of nature, vandalism, and other noncollision damage, accounted for 67 percent of all comprehensive dollars and 27 percent of comprehensive claims. Theft losses accounted for only 2 percent of claims but 13 percent of dollars. This difference was due to the relatively high average theft claim severity of \$14,211. Glass losses accounted for 70 percent of comprehensive claims but only 20 percent of paid dollars, and glass had the lowest claim severity (\$663).

Figure 1: Average loss payment per claim (severity) and percentage of comprehensive claims and paid dollars by loss type for 2020–22 model year passenger vehicles

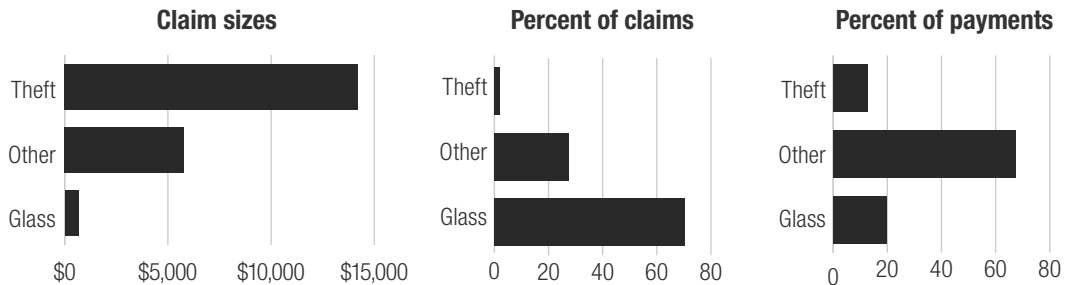

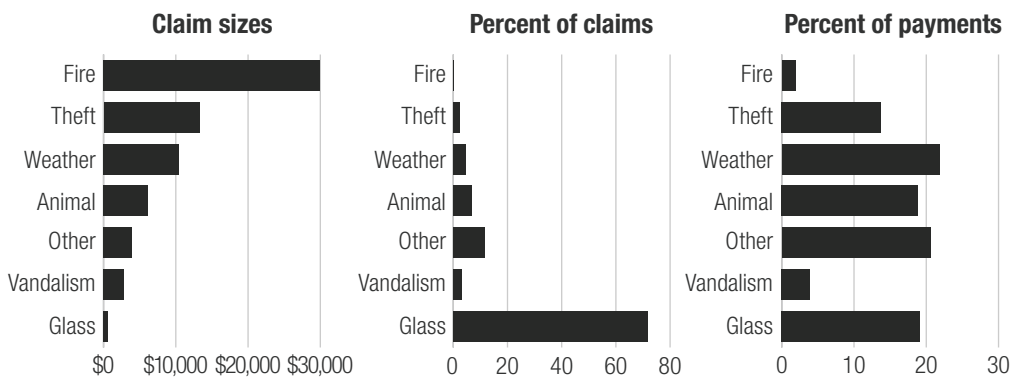

Figure 2 shows claim sizes along with the percentage of comprehensive claims and paid dollars by loss type for 2020–22 model year passenger vehicles, including additional comprehensive coding for weather damage, animal strikes, vandalism, and noncrash fire losses. Additional comprehensive coding was provided by 26 data suppliers. Given the differing distribution of comprehensive claims by region for these specific data suppliers compared with all data suppliers, there may be a geographic bias. Additionally, the data were not standardized, as they were in Figure 1.

Figure 2: Average loss payment per claim (severity) and percentage of comprehensive claims and paid dollars by loss type for 2020–22 model year passenger vehicles including the additional comprehensive coding

► Comprehensive losses by vehicle type

Table 1 lists comprehensive losses for 2020–22 passenger vehicles by vehicle type after all-variable standardization. For 2020–22 model year passenger vehicles, the combined comprehensive claim frequency was 80.4 claims per 1,000 insured vehicle years, the comprehensive claim severity was \$2,356, and comprehensive overall losses were \$189.

Glass had the highest claim frequency (56.6 claims per 1,000 insured vehicle years), followed by other (22.0) and theft (1.7). The order was reversed for claim severity; theft was highest (\$14,211), followed by other (\$5,786) and glass (\$663). Overall losses were highest for other (\$127 per insured vehicle year), followed by glass (\$38) and theft (\$24).

Theft claim frequency was the highest for pickups (2.4 claims per 1,000 insured vehicle years), followed by passenger cars (2.0) and SUVs (1.3). SUVs, however, had a higher glass claim frequency (60.2) than passenger cars (54.2) or pickups (48.4). For other claim frequency, passenger cars had the highest (25.7), followed by pickups (22.4) and SUVs (20.0).

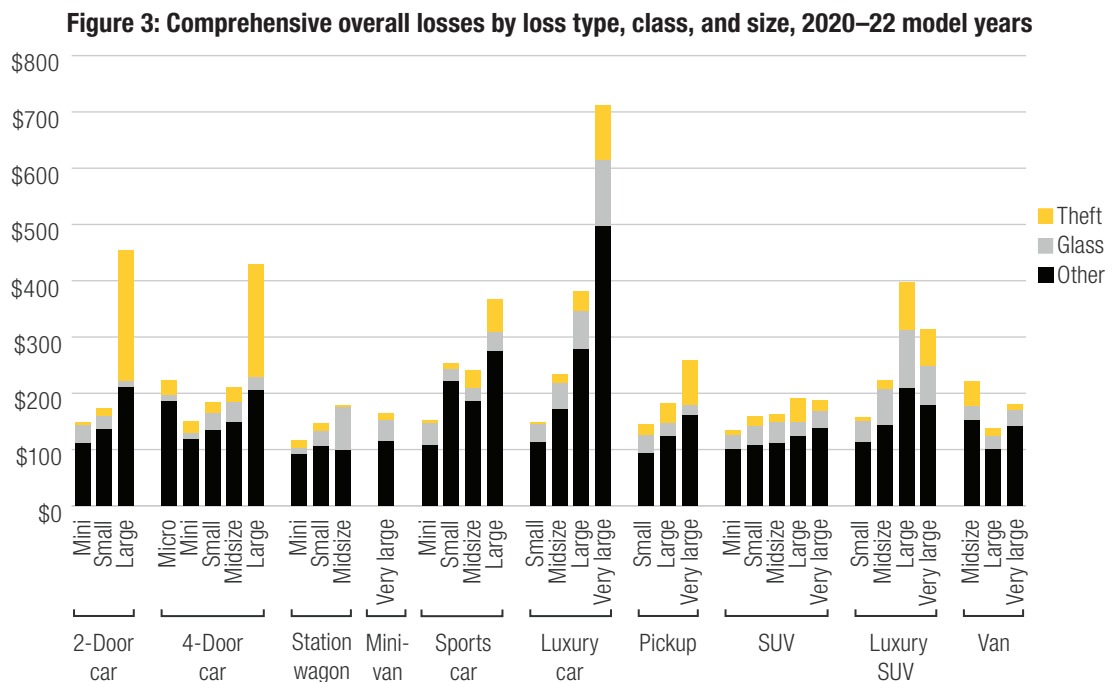

Table 1: Comprehensive losses for 2020–22 model years by vehicle type and loss type after all-variable standardization

	Theft	Glass	Other	Total
Claim frequency				
Passenger cars	2.0	54.2	25.7	81.9
Pickups	2.4	48.4	22.4	73.2
SUVs	1.3	60.2	20.0	81.6
All passenger vehicles	1.7	56.6	22.0	80.4
Claim severity				
Passenger cars	\$13,837	\$670	\$5,762	\$2,594
Pickups	\$15,395	\$507	\$5,425	\$2,507
SUVs	\$14,006	\$697	\$5,908	\$2,194
All passenger vehicles	\$14,211	\$663	\$5,786	\$2,356
Overall losses				
Passenger cars	\$28	\$36	\$148	\$212
Pickups	\$38	\$25	\$121	\$184
SUVs	\$19	\$42	\$118	\$179
All passenger vehicles	\$24	\$38	\$127	\$189

► Comprehensive losses by class and size

Figure 3 shows the amount that each comprehensive loss type contributed to overall comprehensive losses by vehicle class and size groups. All class and size groups are included, regardless of their exposure or claim counts. Other comprehensive losses made up the highest proportion of total comprehensive losses for all size/class groups. Glass losses made up no more than 42 percent of comprehensive losses for all size/class groups. Very large luxury cars had the highest overall losses at \$712. The dollar amounts for glass (\$118) and other (\$496) for very large luxury cars were higher than for any other size/class group. Large two-door cars had the highest theft overall losses (\$233), a category made up of Dodge Challenger variants.

The dollar amount spent for comprehensive overall losses for theft ranged from \$3 for small luxury cars and \$4 for midsize station wagons to \$233 for large two-door cars. The range for glass was somewhat narrower, starting at \$9 for four-door minicars and reaching \$118 for very large luxury cars. Finally, other losses spanned the largest dollar range — from \$92 for mini station wagons to \$496 for very large luxury cars.

Figures 4–7 show relative comprehensive overall losses for the loss types by vehicle class and size for 2020–22 model year passenger vehicles. In each figure, the value 100 represents the average result for all passenger vehicles.

Very large luxury cars had the highest relative total comprehensive losses (376). Mini station wagons had the lowest relative total comprehensive losses (61) (**Figure 4**). Large two-door cars, a category comprising Dodge Challenger variants, had the highest relative theft losses (960), and midsize station wagons (15) had the lowest (**Figure 5**). For glass, four-door minicars had the lowest relative losses (24), and very large luxury cars had the highest (315) (**Figure 6**). Mini station wagons had the lowest relative other losses (72). Very large luxury cars had the highest (390) (**Figure 7**). Small sports cars, small luxury cars, and large vans did not have enough theft exposure to produce credible results.

Figure 4: Relative comprehensive overall losses by class and size, 2020–22 model years

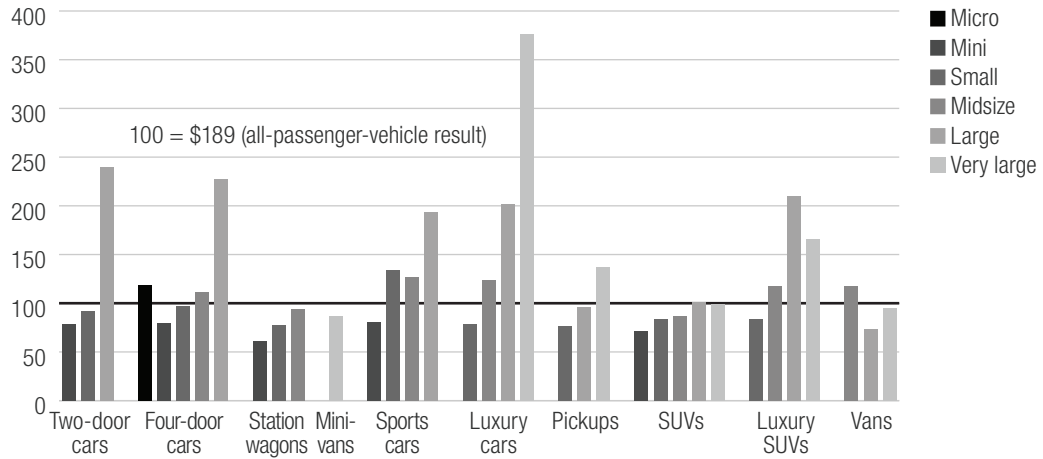

Figure 5: Relative theft overall losses by class and size, 2020–22 model years

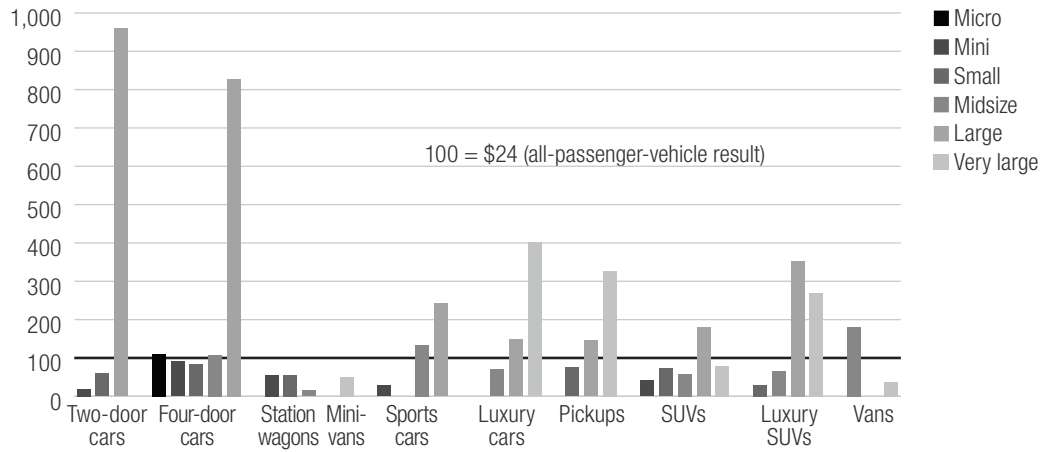

Figure 6: Relative glass overall losses by class and size, 2020–22 model years

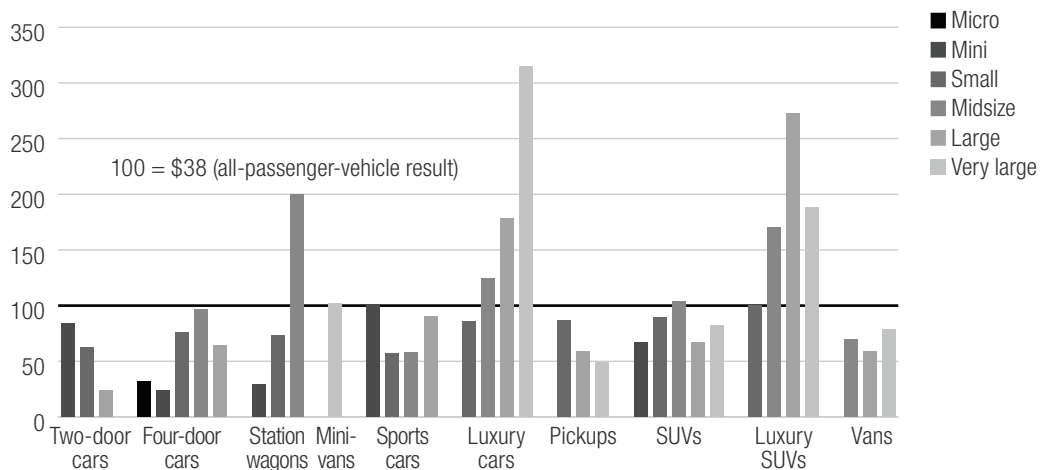

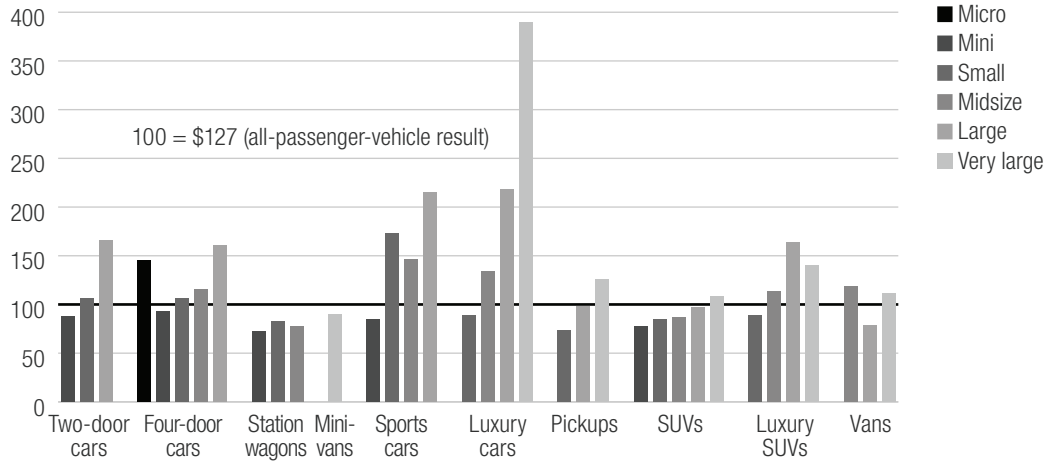

Figure 7: Relative other overall losses by class and size, 2020–22 model years

► **Lowest and highest comprehensive losses**

Tables 2 and 3 list the 2020–22 model year passenger vehicles with the lowest and highest overall comprehensive losses, respectively. Results are presented in relative terms, with the value 100 representing the average overall losses for all passenger vehicles. Vehicles on these lists had to have losses for each of the loss categories to be included.

The Buick Encore four-door, a small luxury SUV, had the lowest result (50), followed by its variant, the Buick Encore four-door 4WD (52) (Table 2). The Ford F-250 4WD, a very large pickup, would have come in first with 39, but it was removed from the list because it did not have enough exposure to produce the theft results. Two other vehicles, which were also pickups, had relative total losses lower than the Buick Encore four-door but were also excluded from the list because of low theft exposure.

Table 2: Lowest comprehensive losses, 2020–22 model years

Make	Series	Model years	Total exposure (insured vehicle years)	Relative overall losses			
				Theft	Glass	Other	Total
Buick	Encore 4dr	20–22	58,098	26	25	62	50
Buick	Encore 4dr 4WD	20–22	39,319	7	25	68	52
Chevrolet	Bolt electric	20–22	63,768	11	36	65	52
Jeep	Wrangler 2dr 4WD	20–22	97,664	48	110	36	52
GMC	Canyon crew cab	20–22	24,741	58	36	58	54
Volkswagen	Taos 4dr	22	28,510	25	53	63	56
Ram	1500 Classic ext. cab 4WD	20–22	44,677	37	20	71	57
Chevrolet	Trax 4dr	20–22	182,129	24	26	72	57
Jeep	Cherokee 4dr 4WD	20–22	318,369	42	56	61	57
Honda	HR-V 4dr	20–22	112,874	44	54	62	58

The Dodge Charger SRT Hellcat, a large four-door car, had the highest overall comprehensive losses (1,503). The Bentley Continental GTC convertible 4WD, a very large luxury car, and the Bentley Bentayga four-door 4WD, a large luxury car, had the second and third highest overall comprehensive losses (1,239 and 1,201). Both were removed because they did not have enough exposure to produce theft results.

Table 3: Highest comprehensive losses, 2020–22 model years

Make	Series	Model years	Total exposure (insured vehicle years)	Relative overall losses			
				Theft	Glass	Other	Total
Dodge	Charger SRT Hellcat	20–22	7,828	10,014	51	308	1,503
Dodge	Challenger SRT Hellcat	20–22	3,914	6,263	19	183	931
Dodge	Charger HEMI	20–22	79,149	2,126	39	205	419
Land Rover	Range Rover 4dr 4WD	20–22	44,446	1,232	385	156	339
Land Rover	Range Rover Sport 4dr 4WD	20–22	78,593	742	327	159	267
BMW	X6 4dr 4WD	20–22	22,136	562	246	207	261
BMW	X7 4dr 4WD	20–22	85,410	529	344	183	260
Mercedes-Benz	GLE class coupe 4dr 4WD	21–22	20,227	396	180	244	251
Mitsubishi	Outlander Sport 4dr	20–22	35,968	802	67	184	240
Land Rover	Defender 110 4dr 4WD	20–22	32,979	29	611	148	225

► Vehicle series comprehensive losses

Detailed comprehensive results for all 2020–22 passenger vehicles with at least 1,000 insured vehicle years of exposure or 100 claims are listed in **Table 4**. Theft losses by series are listed in **Table 5**, glass losses by series are listed in **Table 6**, and other losses are listed in **Table 7**. Exposure requirements for the loss types were 20,000 insured vehicle years for theft and 2,000 insured vehicle years for glass and other. Results are given for total comprehensive coverage and by loss type. The value 100 corresponds to the average result for all passenger vehicles in each category. Individual series are listed in ascending order of relative overall losses within each size and class group. Vehicles discontinued before 2022 and model years predating a vehicle redesign are not listed, but they are included in the overall totals and in the body style and size/class subtotals.

The total exposure accumulated for the three model years was nearly 13.4 million insured vehicle years for passenger cars and almost 33.9 million for pickups, SUVs, and vans. Comprehensive claims numbered more than 1.0 million for passenger cars and more than 2.6 million for pickups, SUVs, and vans.

Within the same size and class group, there was a wide range of results. For example, among midsize luxury cars, the result for the BMW M4 two-door 4WD (462) was more than 7 times the result for the Audi A3 four-door 4WD (63). Among large four-door cars, the result for the Dodge Charger SRT Hellcat (1,503) was nearly 16 times the result for the Chrysler 300 4WD (94).

Table 4: Comprehensive losses by series, 2020–22 model years

— = insufficient exposure to produce reliable results

LWB = long wheelbase

SWB = short wheelbase

Relative results are computed for individual model years and then combined through a weighted average to produce the 3-year relative result.

The all-passenger-vehicle “100 =” value is given for reference only and can only be used as a rough estimate to convert from relative to absolute results.

Minimum requirements for reporting:

Theft = 20,000 vehicle years of exposure

Glass = 2,000 vehicle years of exposure

Other = 2,000 vehicle years of exposure

Total = 1,000 vehicle years of exposure

Table 5: Theft losses by series, 2020–22 model years

SWB = short wheelbase

LWB = long wheelbase

*Relative results are computed for individual model years and then combined through a weighted average to produce the three-year relative result. The all-passenger-vehicle “100” is given for reference only and should only be used as an estimate to convert from relative to absolute results.

Minimum requirement for reporting: 20,000 vehicle years of exposure or 100 claims.

Table 6: Glass losses by series, 2020–22 model years

*Relative results are computed for individual model years and then combined through a weighted average to produce the 3-year relative result. The all-passenger-vehicle “100” is given for reference only and should only be used as an estimate to convert from relative to absolute results.

Minimum requirement for reporting: 2,000 vehicle years of exposure or 100 claims.

SWB = short wheelbase

LWB = long wheelbase

*Relative results are computed for individual model years and then combined through a weighted average to produce the 3-year relative result. The all-passenger-vehicle “100” is given for reference only and should only be used as an estimate to convert from relative to absolute results.

Minimum requirement for reporting: 2,000 vehicle years of exposure or 100 claims.
